

Basics of Onsite Wastewater

October 31, 2018 - Acton, MA

The foundation of installing, inspecting, designing and understanding onsite wastewater systems is covered in this class.

Learn the basic characteristics of wastewater and how soils can change and treat effluent. Become familiar with "wastewater math" and remove the fears of calculating tank capacity, pump down, gallons per inch and much more.

Participants will also review both existing and new conventional systems. This is a very comprehensive one-day class that will give you a solid understanding and foundation for future classes.

SPEAKERS

Dr. Sara Heger, University of Minnesota, Water Resources Center
Onsite Sewage Treatment Program

Claire Golden, MassDEP Wastewater Management and Surface
Water Permitting Programs
